

Component to HDMI Converter

DESCRIPTION:

The Component to HDMI Converter is a device that allows analog devices to be integrated seamlessly into a digital display. It also takes analog audio and encodes it onto the HDMI signal for the full HDMI video and audio effect. Since it is upconverting in this situation, you will be getting the best possible quality from your component source. The conversion box will scale the image so that it comes out in High Definition resolutions, rather than simply stretching a low-def image.

FEATURES:

- Easily switch between Y-Pb-Pr + Audio to HDTV
- Supports HDTV resolution up to 1080i
- HDCP Compliant
- Installs in seconds
- Allows to connect DVD etc. with component outputs to a HDMI display

PART NUMBER

R01-CVT-01

DESCRIPTION

Component to HDMI Converter
