

DVI FIBER EXTENDER

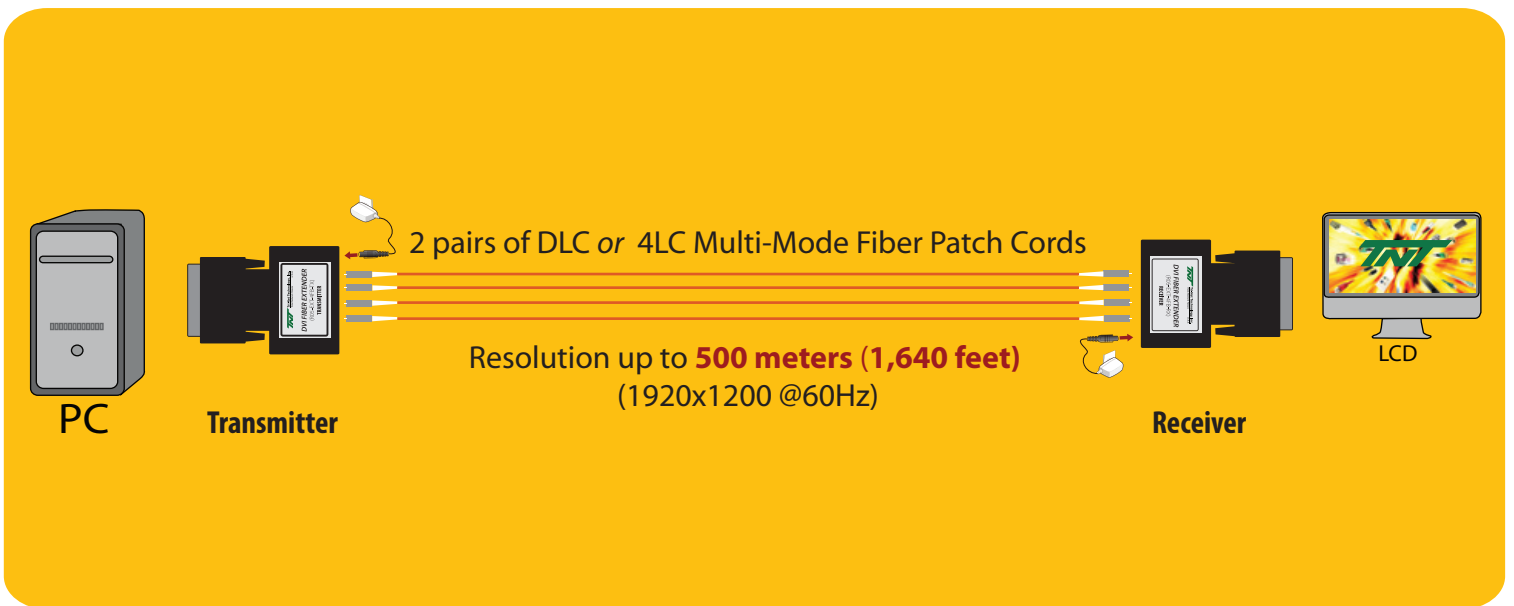

DESCRIPTION

The DVI Fiber Extender is a high-quality uncompressed data link between a host processor video card and a display peripheral with the transmission stretches the performance beyond the limitations of copper wire with long length (up to 500 meters or 1640 ft), data security, negligible RFI/EMI and the elimination of costly analog distribution systems over 2 pairs of LC Duplex or 4 LC multi-mode fibers at WUXGA (1920x1200@60Hz)

FEATURES

- Extend all VESA resolution up to WUXGA (1920x1200 @60Hz) DVI data up to 500 meters (1,640 feet)
- Detachable features with 2 pairs of duplex LC or 4LC multi-mode fibers.
- Includes 2 +5VDC power adapters for the transmitter and receiver

PART NUMBER

R05-EXT-4FB

DESCRIPTION

DVI Fiber Extender - Transmitter & Receiver - 1 set
