

Features:

- Automatically provides compensation for DVI cables.
- Compatible with DTV Resolutions 480i, 480p, 720p, 1080i, and 1080p.
- Compatible with Computer Resolutions VGA, SVGA, XGA, SXGA, UXGA.
- Extends the transition-minimized differential signaling (TMDS) interface length as follows:
 - 0 to 45 Meters Over DVI-Cable, 24 AWG STP.
 - 0 to 36 Meters Over DVI-Cable, 28 AWG STP.
- Power adapter included.

Description

The DVI Extender/Equalizer extend the DVI signal up to 150 feet while keeping the image 100% intact and pristine. The extender simply takes the signal coming from the attached DVI source over 150 feet and qualize it, sending it over a short DVI cable to the display. The image will appear as if the source were right next to the display.
