**April 7, 2003**

**TRI-NET TECHNOLOGY, INC. IS FIRST TO JOIN  
THE BELDEN CERTIFIED ASSEMBLER PROGRAM**

**RICHMOND, IN** – Belden Electronics Division announces that Tri-Net Technology, Inc., an expert supplier of local area networking (LAN) assemblies, has become the first company to join the Belden Certified Assembler (BCA) program. Tri-Net has been a value-added distributor of Belden cables, both domestically and internationally, since the early 1990s.

The BCA program will be comprised of an elite group of assemblers displaying the following attributes: an excellent reputation in the industry, a high level of technical and assembly expertise, and a continued dedication to the delivery of high-quality goods and services. Belden Certified Assemblers also must, by definition, assemble and/or manufacture cable assemblies using Belden components.

According to Tom Chung, President of Tri-Net Technology, Inc., "This membership in Belden's Certified Assembler's program serves to both symbolize and reinforce Tri-Net's continual commitment to quality and service **on a worldwide basis**. Since Belden's program requires a strict adherence to these same attributes, we're honored **to be the first** assembler selected for the program. We also expect that this new partnership will further strengthen our relationship with Belden and open more doors for us in this very competitive field – especially **in Asia** and Mexico where we have facilities to accommodate these growing markets."

For more information, contact Belden Electronics Division, P.O. Box 1980, Richmond, Indiana, 47375, or call 1-800-BELDEN-4, fax: 765-983-5294. Or visit the Web site at [www.belden.com](http://www.belden.com)

**About Belden Electronics Division**

Belden Electronics Division, a unit of Belden Inc., is a leader in the design, manufacture and marketing of specialty wire and cable products for the electronics and electrical markets. Belden Electronics Division is headquartered in Richmond, Indiana. Belden has manufacturing facilities in the U.S., Canada, Australia, Germany, the Netherlands, and Hungary, with distribution centers in the U.S., Canada, Singapore, Australia, and the Netherlands. A majority of Belden's manufacturing, engineering and support functions are registered to the International Organization for Standardizations.
